POPULATION

The population projections on this report are based upon 1970 census data, estimates developed by the Bureau of Planning, Research and Evaluation using cohort survival figures, estimates by the Bureau of Vital Statistics, and projections made by the Lawrence Berkeley Laboratory at the University of California.

Because the 1970 census is the only actual count and breakdown of the Idaho population, we must assume that the estimates and projections made during the course of the decade contain an ever increasing possibility of errors. Within Idaho, the problems of projection are most keenly evident in the minority segments of the population. In 1970 the minorities in the State comprised only a small percentage of the total population and, until the results of the 1980 census are received, the accuracy of projections based on so small a segment of the population will not be known.

The census will be conducted on April 1, 1980 and the preliminary reports should be available within a year of that date. The more detailed publications will not be available for at least two years after the actual census tabulation. Because the classification of some minority groups will be left to the individuals being counted (notably the Spanish-American population), the figures obtained will not be strictly comparable to the 1970 census.

The Bureau of Vital Statistics, Department of Health and Welfare, is the agency designated by the Governor to work with the Bureau of the Census in implementing the Federal-State Cooperative Program for Local Population Estimates.

The latest estimates available (July 1, 1978 and July 1, 1977) are shown in Table 1 along with the components of change from 1970 to 1978.

The county estimates for July 1, 1978 were developed through an average of the following methods and adjusted to conform with the State totals:

1. The Regression model. In the regression method a multiple regression equation is used to relate changes in a number of different data series to change in population distribution. The data used for Idaho are: three-year average of resident births (X_1), three-year average of resident deaths (X_2), covered employment (X_3), and elementary school enrollment in grades 1 through 8 plus elementary special and elementary ungraded (X_4). The regression equation for Idaho is $Y = 0.0399 + 0.4045X_1 + 0.1738X_2 + 0.0868X_3 + 0.2837X_4$.
2. Component Method II[1/]. This method employs vital statistics to measure natural increase and school enrollment to measure net migration. The estimates produced by Component Method II are specific to the population under 65 not residing in group quarters. To this population is added an estimate of the population 65 and over based on the change in Medicare enrollees from 1970 to the estimate date, the institutional and cottage population, and reported military population living in barracks.
3. The Administrative Records method. This is a component method which uses individual federal income tax returns to measure the inter-county migration of the nongroup quarters population and reported birth and death statistics to estimate natural increase. The tax returns are matched by Social Security number in the base year and the estimate year to determine the number of persons whose county of

residence changed during the period. A net migration rate based on exemptions claimed by the matched cases is then applied to the total population. This estimate is made specific to the nongroup quarters population under 65 by excluding from the migration computations data relating to persons 65 and over as well as persons residing in group quarters. These estimates are then combined with the independent estimates of the population 65 and over used in the Component Method II estimate and the other components of population change (births, deaths, immigration, and the net movement between the military and civilian population).

Figures A and B are drawn from the Current Population Reports of the Bureau of the Census and are included to indicate trends although they date only to 1977.

Table 2 and Figure C further illustrate the population projections by age, sex, and race. Once again, it is necessary to point out the relatively low numbers within the minority population. The problems inherent in projecting with such small numbers are even more pronounced in the labor force statistics that are dealt within this report. Because small shifts in numbers or percentages can make a great deal of difference from year to year, great care should be exercised while attempting to locate trends among these members of the population.

On a related note, the large drop-off between the 20-24 and 25-29 age groups may not be as large as the projections indicate. Changes in Idaho's migration pattern over the last decade may well prove to be greater than anticipated when the 1980 census breakdowns become available. The new count may well show a large shift in the 25-29 migration patterns

as Idaho's growth slows the out-migration of the past.

The other powerful element in Idaho's growth pattern, the birth rate, continues to run well above the national average. According to the Bureau of Vital Statistics, the 1978 Idaho birth rate was 22.0 per 1,000 population which was 44 percent above national levels. The estimated fertility rate in 1978 was 98.8 live births per 1,000 women 15-44 years of age which was 49 percent above the national average.

While many different projections are available for Idaho's future population, we may at least assume a large growth rate for several years.

I-63-11 (2-70)

COUNTY WORKSHEET

LABOR FORCE & EMPLOYMENT STATUS

Idaho's 1981 labor force size and composition is illustrated in Table 4 and Figures D and E.

Table 4 is an age and sex breakdown of the labor force while Figures D and E offer a comparison of the labor force rates for the years 1960, 1970, 1980 and 1981.

The participation rates for men remain fairly stable with those projected for 1980 with the exception of the groups at each end of the scale; the 16-17 year group and the 65+ group. This higher rate for the 65+ group is probably due, in part, to the loosening of restrictions on retirement. The law increasing the age for mandatory retirement from 65 to 70 went into effect January 1, 1979 and may have the effect of increasing the participation rate of 65 and older as the age of the population shifts.

Participation for both young men and women in the 16-17 year bracket is increasing. The participation of women in the labor force continues to increase as the opportunities for women increase, and more women find it economically necessary to join the work force.

TABLE 4

LABOR FORCE PROJECTIONS

UNEMPLOYMENT

The projected 1981 unemployment rate for Idaho is 5.6. This is lower than the rate projected for last year in anticipation of an improving unemployment picture.

Although the overall rate is subject to various economic fluctuations, the relationships between the various categories should remain substantially the same. Table 6 illustrates the high unemployment rates in the younger age groups while Figure F indicates the same high rates among the non-white segments of the population.

TABLE 6

UNEMPLOYMENT PROJECTIONS

TABLE 10

EXTENT OF UNEMPLOYMENT BY SEX AND RACE

IDAHO 1975

(Persons 16 Years Old & Over; Numbers in Thousands)

Sex	Total With Unemployment: Number	Total With Unemployment: Percent of Total Who Worked or Looked for Work	Percent of Unemployed Who: Did Not Work But Looked for Work	Percent of Unemployed Who: Worked During the Year	Average Number of Weeks Unemployed
All Men	47	19.2	4.3	95.7	14.5
White Men	47	19.1	4.3	95.7	14.5
Black Men	-	-	-	-	-
All Women	32	18.7	9.4	90.6	12.7
White Women	31	18.5	9.7	90.3	12.8
Black Women	-	-	-	-	-

Dash (-) represents 500 or less, or zero.

Source: Survey of Income and Education, Spring 1976

Table 11 compares occupational distributions of employment by sex for the years 1970, 1977 and 1978. 1970 data is from the census, 1977 and 1978 are from the CPS.

Tables 12-16 represent employment projections for vocational/technical occupations in Idaho 1979-1984. These projections are based upon 1970 census occupational staffing patterns and employment projections done by the Idaho Department of Employment; Planning, Research, and Evaluation Bureau.

TABLE 11

OCCUPATIONAL DISTRIBUTION OF EMPLOYMENT BY SEX, IDAHO, 1970, 1977, 1978

	Percent of Total Employed								
	Total			Men			Women		
	1970	1977	1978	1970	1977	1978	1970	1977	1978
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
White-Collar Workers	43.1	46.6	46.7	34.8	37.0	36.2	58.5	61.5	62.5
Professional and Technical	13.5	14.4	14.5	12.2	14.6	14.3	15.9	14.1	14.8
Managers and Administrators, Except Farm	9.8	10.0	10.1	12.4	12.7	13.2	4.9	5.6	5.4
Sales Workers	6.5	6.4	6.4	5.8	5.4	4.7	7.8	7.9	8.8
Clerical Workers	13.3	15.8	15.7	4.4	4.2	4.0	29.9	33.9	33.4
Blue-Collar Workers	32.4	32.5	33.2	42.3	46.0	46.8	13.9	11.5	12.6
Craft and Kindred Workers	12.7	15.5	15.6	18.6	24.2	23.7	1.6	1.9	3.3
Operatives, Except Transport	10.2	7.7	8.2	10.3	8.1	9.0	10.1	7.1	7.1
Transport Equipment Operatives	4.1	4.6	4.0	6.0	6.9	6.2	0.6	1.1	(1)
Nonfarm Laborers	5.4	4.7	5.4	7.4	6.8	7.9	1.6	1.5	1.6
Service Workers	13.1	13.2	12.4	6.6	6.2	5.9	25.3	24.2	22.4
Farm Workers	11.4	7.7	7.7	16.3	10.8	11.1	2.2	2.9	2.5

(1) Less than 500 persons employed or less than 1.0 percent of total employed.
1970 data from census.
1977, 1978 data from Current Population Survey.

TABLE 12

IDAHO EMPLOYMENT BY INDUSTRY

INDUSTRY	Employment 1970	Employment 1980	Percent Change 1970 - 1980
Total All Industries	285,234	395,381	38.6
Agriculture, Forestry, Fisheries	50,178	36,625	-27.0
Mining	3,540	3,944	11.4
Construction	17,562	30,345	72.8
Manufacturing	40,445	63,133	56.1
Transportation, Communications & Utilities	16,280	22,426	37.8
Trade	58,981	90,245	53.0
Finance, Insurance & Real Estate	8,975	18,642	107.7
Services	75,575	110,388	46.1
Government Administration	13,698	19,628	43.3

TABLE 13

LABOR FORCE STATUS BY OCCUPATION

1977, 1978 ANNUAL AVERAGES

IDAHO

(Numbers in Thousands)

Class of Worker	Employment		Unemployment		Unemployment Rate	
	'77	'78	'77	'78	'77	'78
Total	367	382	23	23	5.9	5.7
White-Collar Workers	171	179	7	6	3.7	3.3
Professional and Technical	53	56	2	2	3.2	3.1
Managers and Administrators, Except Farm	37	39	1	1	3.1	1.7
Sales Workers	(1)	24	(1)	1	(1)	3.6
Clerical Workers	58	60	3	2	5.2	3.6
Blue-Collar Workers	119	127	11	11	8.1	8.2
Craft and Kindred Workers	57	59	3	3	4.4	4.4
Operatives, Except Transport	28	31	4	4	13.2	10.3
Transport Equipment Operatives	(1)	15	(1)	1	(1)	8.2
Nonfarm Laborers	(1)	21	(1)	4	(1)	14.8
Service Workers	49	48	4	4	7.9	7.0
Farm Workers	28	29	1	1	3.0	4.2

(1) Data are not shown when they do not meet BLS standards of reliability for the particular state, based on the sample in that state.

Note: Items may not add to totals because of rounding. Unemployed persons with no previous work experience are not shown separately but are included in the total. Unemployment rates shown were calculated by using rounded data.

Farm Labor Supervisors	01.0100	503	8	42	50	20	105	125

While these types of statistics are particularly useful in planning, they are also difficult to obtain on a regular basis. Although the census offers a good breakdown of many of these characteristics, it is also woefully out of date at this time. Included in the following pages are reprints of tables found in the Survey of Income and Education (SIE), and tables of information contained in SIE and Current Population Survey (CPS) publications.

The SIE, carried out in the spring of 1976, was conducted to fulfill requirements of the Education Amendments of 1974 (Public Law 93-280, Section 822(a). The SIE was administered by the Bureau of the Census at the request of the Department of Health, Education, and Welfare. The Bureau of the Census carried out this legislative mandate by augmenting the regular March 1976 Current Population Survey with a supplemental general population sample of approximately 151,000 household interviews.

The major purposes of the SIE were to collect information necessary to (1) determine the number of school age children in each state living in families with incomes below the poverty level; (2) ascertain the number of persons who because of limited English-speaking ability are in need of bilingual educational teaching guidance and counseling; and (3) provide information on a number of other subjects including school enrollment, food stamp and public assistance recipients, housing tenure and outlays, liquid asset holdings, child and adult disability, and public and private health benefit coverage.

Table 54. SELECTED CHARACTERISTICS OF FAMILIES AND UNRELATED INDIVIDUALS, BY TOTAL MONEY INCOME IN 1975, FOR IDAHO: SIE

(NUMBERS IN THOUSANDS. FAMILIES AND UNRELATED INDIVIDUALS AS OF SPRING 1976. RACE AND SPANISH ORIGIN, AGE, OCCUPATION, WORK EXPERIENCE, AND EDUCATIONAL ATTAINMENT CHARACTERISTICS ARE SHOWN FOR HUSBAND IN HUSBAND-WIFE FAMILIES AND HEAD IN OTHER FAMILIES. SEE NOTE IN TEXT. FOR EXPLANATION OF SYMBOLS, SEE TEXT)

1/ From U.S. Department of Commerce as of July, 1978

2/ Obtained by multiplying the percent of population under 18 years of age as reported on the 1970 Census times the July, 1978 estimate of population.

The last section of this report is a copy of the latest (September 1979) Department of Employment ESARS report. ESARS stands for Employment Service Automated Reporting System and is a matrix of information concerning job applicants on file at local Idaho Job Service offices. Because the selection process is based simply on those members of the labor force who chose to list themselves at a Job Service office, the system is obviously not designed to be a representative sampling of the Idaho labor force. If this restriction is kept in mind, however, the level of detail in these matrices can be useful when trying to form an image of the Idaho labor pool.

ERRATA

Revision to Annual Planning Report 1981

Idaho Department of Employment

Due to a programming error, the category "Hispanic" was not originally included in these ESARS matrices. The data for Hispanics have been pulled out of the "Other" category and the percentages have been recalculated for Hispanics and Other. This information is included on these additional pages. Please disregard the "Spanish Sur-name category" on the original tables.
